The Dolomites range comprises a number of impressive peaks, 18 of which rise to more than 10,000 feet. The bold peaks flecked with snow, above green meadows and beneath a blue sky, offer a unique and breathtaking mountain scenery.

The Dolomites area features some of the most beautiful mountain landscapes anywhere, with vertical walls, sheer cliffs and a high density of narrow, deep and long valleys. Turquoise ...

Although in the Arctic Circle, winter in Iceland offers some outstanding Arctic light during the day. There is a benefit to these short hours of light – the sun stays low on the horizon, offering a handful of hours with gorgeous warm light. Also, as the winter sun rises and sets to the south and stays just above the horizon for longer, most of the locations are perfect for sunrise and sunset photography.

Unpredictable weather patterns in Iceland are the norm. You can be within a snowstorm and 30 minutes later experience sunshine conditions. It is this unpredictability that makes Iceland one of the most exciting places to photograph.

**An** island in the Aegean Sea like no other, the most westerly of the Cyclades. The Greek island of Milos has been inhabited for at least five thousand years. It was first colonised by the Phoenicians, who called it Byblos or Byblis, and afterwards by the Lacedaemonians, or at least by Dorians.

The position of Milos, between Greece and Crete, and its possession of obsidian, made it an important centre of early Aegean civilisation. Excavations of the British school revealed a Minoan palace and a town wall.

The length of the island is about fourteen miles from east to west, and its breadth from north to south eight miles.

Milos owes its distinctive topography and ...

However, the most typical sceneries of the region are those that merge the beauty of nature with the millenary work of man. Medieval villages, historical towns, castles and defence systems, country churches and beautiful abbeys like the one of Sant'Antimo.

Tuscany is known for its landscapes, traditions, history, artistic legacy and influence on high culture. It is regarded as the birthplace of the Renaissance, has been home to many influential figures in the history of art and science, and contains well-known museums such as ...
